 Will be reviewed

8. Which activity in the general design process focuses on identifying the system's major components and their relationships? *

- ☐ Interface design
- ☒ Component selection and design
- ☐ Database design
- ☐ Architectural design

 Will be reviewed

9. Incremental planning in XP prevents structural degradation of the system and ensures long-term software quality. *

- ☐ True
- ☒ False

 Will be reviewed

10. Describing how a system should behave in exceptional situations is part of functional requirements. *

- ☒ True
- ☐ False

 Will be reviewed

11. In XP, the customer actively participates in the software validation phase during each iteration. *

- ☒ True
- ☐ False

 Will be reviewed

2 12. Which XP practice MOST directly supports developer well-being while also improving long-term productivity? *

- ☐ Pair programming
- ☐ Small releases
- ☒ Sustainable pace
- ☐ Continuous integration

 Will be reviewed

1 13. Software maintainability refers to software being understandable, usable, and compatible with other systems. *

- ☐ True
- ☒ False

 Will be reviewed

1 14. The SRS document is the main deliverable of the requirements specification phase in the software development process. *

- ☒ True
- ☐ False

 Will be reviewed

2 15. Which of the following groups are intended readers of both user and system requirements specification? *

- ☒ Client engineers
- ☐ Client managers
- ☒ System architects
- ☒ System end-users
- ☐ Software developers

 **Will be reviewed**

16. Which of the following is NOT usually considered part of a software system? *

- ☐ User documentation
- ☐ System documentation
- ☒ Hardware documentation
- ☐ Supporting online resources

 **Will be reviewed**

17. Which of the following is NOT considered a stand-alone application system? *

- ☐ ERP system
- ☐ Spreadsheets
- ☒ PayPal API
- ☐ CAD program

 Will be reviewed

18. User requirements focus primarily on how the system will be implemented. *

- ☐ True
- ☒ False

 Will be reviewed

19. In a distributed Scrum environment, which of the following practices MOST effectively ensures that all team members are aware of the state of the product at any time? *

- ☐ Real-time communication
- ☐ Detailed documentation
- ☐ Status reports
- ☒ Continuous integration

 Will be reviewed

20. Agile methods maximize speed by avoiding work that has dubious long-term value. *

- ☒ True
- ☐ False

 Will be reviewed

21. Any developer can modify any part of the codebase, provided that all tests pass afterward. Which XP principle does this MOST demonstrate? *

- ☒ Collective ownership
- ☐ Pair programming
- ☐ Refactoring
- ☐ Test-first development

 **Will be reviewed**

22. The software must have an intuitive interface so that users can learn it within 10 minutes. This is an example of a requirement.

*

- ☐ Functional
- ☒ Product
- ☐ External
- ☐ Organizational

 **Will be reviewed**

23. If the requirements are not clearly identified during generic software development, the developers consult the customer to clarify them. *

- ☐ True
- ☒ False

 **Will be reviewed**

24. helps developers uncover implicit user requirements that might not be stated explicitly. *

- ☒ Task analysis
- ☐ Feasibility study
- ☐ Risk analysis
- ☐ Performance analysis

 **Will be reviewed**

1

25. Which of the following is NOT part of software dependability? *

- ☐ Reliability
- ☐ Safety
- ☒ Responsiveness
- ☐ Security

 **Will be reviewed**

1

26. Beta testing is conducted by to validate the software before public release. *

- ☐ Developers
- ☒ Customers
- ☐ Testers
- ☐ End users

 **Will be reviewed**

27. The ScrumMaster's role in daily Scrums is to assign tasks to team members. *

☐ True

☒ False

✍ Will be reviewed

28. A company is developing a control software for new anti-lock braking system in a car. This software must interface directly with sensors and hydraulic hardware. Which development model is best suited for this project? *

☒ Waterfall model

☐ Scrum

☐ Kanban

☐ XP

✍ Will be reviewed

29. The velocity in Scrum is an empirical measure of how much product backlog effort a development team can complete in a sprint. *

☒ True

☐ False

✍ Will be reviewed

30. During a sprint, the Product Owner can add new items to the Sprint Backlog if they are urgent, high priority business needs. *

- ☐ True
- ☒ False

 **Will be reviewed**

31. In which of the following models is the system designed to accommodate frequent changes in customer requirements? *

- ☐ Waterfall model
- ☐ V model
- ☐ Spiral model
- ☒ XP model

 **Will be reviewed**

32. A company is developing a hospital management system. Which stakeholder group can confirm whether the implemented system matches their needs as defined in user and system requirements? *

- ☐ Client managers
- ☒ System end-users
- ☐ Contractor managers
- ☐ Client engineers

 **Will be reviewed**

33. Inspections and reviews are considered validation techniques in which simulated test data is used to check whether the software meets user needs. *

☒ True

☐ False

 Will be reviewed

2 34. Which of the following is an input to the design process? *

☒ Data descriptions

☐ Component descriptions

☐ Interface specification

☐ Database specification

 Will be reviewed

2 35. The statement “Each staff member shall be uniquely identified by an eight-digit number” is an example of a functional requirement. *

☒ True

☐ False

 Will be reviewed

2 36. In XP, the development team intends to deliver useful business functionality to the customer in about weeks. *

☐ 1

☒ 2

☐ 3

☐ 4

 **Will be reviewed**

1

37. In the Waterfall model, the customer is involved throughout the entire development process. *

☐ True

☒ False

 **Will be reviewed**

2

38. A development team integrates a reusable user authentication package into its .NET system. The package is compiled into the application and executed locally. This is an example of a *

☐ Web service

☐ Stand-alone application system

☒ Collection of objects

☐ Generic application

 **Will be reviewed**

2

39. An online shopping system allows users to place orders and requires all transactions to be encrypted. Which of the following is a non-functional requirement? *

- ☐ Users shall be able to place orders online
- ☐ The system shall display order confirmation
- ☐ The system shall calculate the total order price
- ☒ All transactions must be encrypted

✉ Will be reviewed

1

40. What is the main input of a sprint in the Scrum sprint cycle? *

- ☒ Product backlog
- ☐ Sprint backlog
- ☐ Potentially shippable software
- ☐ Sprint retrospective

✉ Will be reviewed

2

41. An airline booking system must be available 24/7. This requirement is an example of a requirements. *

- ☒ Efficiency
- ☐ Reliability
- ☐ Security
- ☐ Usability

 Will be reviewed

2

42. A development team insists on implementing a feature from scratch even though a reusable component exists, because the component forces unwanted changes to user workflows. This will in turn lead to*

- ☐ Reduced system complexity
- ☐ Reduced system reliability
- ☐ Faster delivery of the software
- ☒ Requirements compromise issues
