 **Will be reviewed**

8

Digital certificates cannot be used to prevent non-organizational devices to access the server. 

☐ True

☒ False

 **Will be reviewed**

9

..... are a type of attack where a malicious user uses a valid input field to input malicious code or database commands. 

- ☒ Injection attacks
- ☐ viruses
- ☐ phishing
- ☐ Brute force attacks

 **Will be reviewed**

10

..... attacks are possible when systems are programmed in C or C++. 

- ☒ Buffer overflow
- ☐ SQL-injection
- ☐ Cross-site scripting attacks

 **Will be reviewed**

11

Python uses to handle the error 

☒ try-except

☐ try-catch

☐ on error

 **Will be reviewed**

12

In RAFT algorithm, the number of nodes is 

☐ odd

☒ even

☐ any number

 **Will be reviewed**

13

We need to restart the system when we want to restart the microservice again

☐ True

☒ False

 **Will be reviewed**

14

Microservices are implemented using the same programming language 

☐ True☒ False

 **Will be reviewed**

15

Input validation is critical for security and reliability. 

☒ True☐ False

 **Will be reviewed**

16

Weaknesses of password-based authentication are 

☒ Insecure passwords☒ Phishing attacks☒ Password reuse☒ Forgotten passwords

 **Will be reviewed**

17

..... is a measure of the number of relationships that parts of a component have with each other. 

- ☒ Cohesion
- ☐ Coupling
- ☐ microservices architecture

 **Will be reviewed**

18

The starting point for product development is a business opportunity that is identified by individuals or a company. this is called 

- ☒ Product software engineering
- ☐ Project-based software engineering
- ☐ Project Managment
- ☐ Moor's vision

 **Will be reviewed**

19

PHP is 

- ☐ active page
- ☐ Web server
- ☒ Web programming lanauage

☑ **Will be reviewed**

20

The next figure represents the Server Virtualization. What is B? 📄

- ☐ Software
- ☐ Microservice
- ☐ Hardware
- ☒ Operating System
- ☐ Virtual machine
- ☐ Virtual toolbox
- ☐ hypervisor
- ☐ container

☑ **Will be reviewed**

21

The next figure represents the Server Virtualization. What is F? 📄

- ☐ Software
- ☒ Microservice
- ☐ Hardware
- ☐ Operating System

- ☐ Virtual machine
- ☐ Virtual toolbox
- ☐ hypervisor
- ☐ container

 **Will be reviewed**

22

The product developers may work in a particular area (say, marketing and sales) and understand the software support that they need. This is called 

- ☐ Domain experience
- ☒ Product experience
- ☐ Customer experience
- ☐ Product prototyping

 **Will be reviewed**

23

"Login with Google", Google here is called 

- ☒ Trusted authenticator
- ☐ Service
- ☐ Third party

☐ proxy

 **Will be reviewed**

24

Microservices do not have external dependencies. 

☐ True

☒ False

 **Will be reviewed**

25

Web services refer to a set of loosely coupled software components that exchange information with each other using a specific web communication standards and languages. 

☒ True

☐ false

 **Will be reviewed**

26

Symbolic execution can be used in software testing 

☒ True

☐ False

 **Will be reviewed**

27

The next figure represents the Server Virtualization. What is D? 

- ☐ Software
- ☐ Microservice
- ☐ Hardware
- ☐ Operating System
- ☒ Virtual machine
- ☐ Virtual toolbox
- ☐ hypervisor
- ☐ container

 **Will be reviewed**

28

The next figure represents 

- ☒ symmetric encryption
- ☐ asymmetric encryption

☐ encryption

☑ **Will be reviewed**

29

..... are used to refine a product vision and identify product features 

- ☒ Product vision management
- ☐ Product roadmap development
- ☐ User story and scenario development

☑ **Will be reviewed**

30

Users of existing software (such as word processing software) may see simpler and better ways of providing comparable functionality and propose a new system that implements this. This is called 

- ☐ Domain experience
- ☐ Product experience
- ☒ Customer experience
- ☐ Product prototyping

☑ **Will be reviewed**

31

Software execution models are 

- ☒ Stand-alone execution
- ☒ Hybrid execution
- ☒ Software as a service
- ☐ mobile or web applications
- ☐ desktop applications

 **Will be reviewed**

32

The next figure represents the Server Virtualization. What is C? 

- ☐ Software
- ☐ Microservice
- ☐ Hardware
- ☐ Operating System
- ☐ Virtual machine
- ☐ Virtual toolbox
- ☒ hypervisor
- ☐ container

 **Will be reviewed**

33

Replication of database is one of limitations of microservices 

☐ True

☒ False

 **Will be reviewed**

34

Microservices interact among them using communication 

☐ only synchronous

☐ only asynchronous

☒ synchronous or asynchronous

 **Will be reviewed**

35

..... is the process of developing an early version of a product to test your ideas and to convince yourself and company funders that your product has real market potential. 

☐ Domain experience

☐ Product experience

- ☐ Customer experience
- ☒ Product prototyping

 **Will be reviewed**

36

Area = 3.14 * Redius * Redius; This is sentence is a clean code statement 

- ☐ True
- ☒ False

 **Will be reviewed**

37

In regular expression, The forces ait must match to the end of the string

- ☐ ^
- ☒ \$
- ☐ \.
- ☐ .

 **Will be reviewed**

38

In regular expression, The forces a match to begin at the start of a string

☐ ^

☐ \$

☒ \.

☐ .

Will be reviewed

39

..... is a measure of the number of relationships that one component has with other components in the system.

☐ Cohesion

☒ Coupling

☐ microservices architecture

Will be reviewed

40

All applications which are running in computers are C functions.

☒ True

☐ False

 **Will be reviewed**

41

You should prevent the user for manual checking the range of of the input range. 

☒ True

☐ False

 **Will be reviewed**

42

The next figure represents the Server Virtualization. What is A? 

☐ Software

☐ Microservice

☒ Hardware

☐ Operating System

☐ Virtual machine

☐ Virtual toolbox

☐ hypervisor

☐ Container

 **Will be reviewed**

43

Microservices may be implemented using same programming languages 

☐ True

☒ False

 **Will be reviewed**

44

The next figure represents the Server Virtualization. What is E? 

☐ Software

☐ Microservice

☐ Hardware

☐ Operating System

☐ Virtual machine

☐ Virtual toolbox

☐ hypervisor

☒ container

 **Will be reviewed**

45

Stand-alone is the software that executes entirely on the customer's computers.

☒ True

☐ False

Will be reviewed

46

In an asynchronous interaction, service A issues a request to service B. Service A then suspends processing while B is processing the request.

☐ True

☒ False

Will be reviewed

47

The program enters a state where normal continuation is impossible. This is called

☒ Program exceptions

☐ Timing failures

☐ Data failures

Will be reviewed

48

Symbolic execution is a way of executing a program abstractly. 

☒ True

☐ False

 **Will be reviewed**

49

The large companies use model 

☒ client/server

☐ master/slave

☐ peer-to-peer
