

7. الكود (قد تمت مراجعة بيانات الطالب ورقم الجلوس). *

KCVV

 **Will be reviewed**

8. One of the main challenges of heterogeneity is ensuring that new software can integrate reliably with older legacy systems. *

☒ True

☐ False

 **Will be reviewed**

9. Which activity in the general design process is MOST concerned with defining how system components interact with each other and with external systems? *

☒ Interface design

☐ Architectural design

☐ Component selection and design

☐ Database design

 **Will be reviewed**

10. Which of the following MOST directly influence how software process activities are performed in a project? *

☒ Type of organization developing the software

☐ Programming language used

☐ Hardware available

☐ Project budget

 **Will be reviewed**

11. Payroll systems is an example of which type of software application? *

- ☐ Stand-alone application
- ☐ Interactive transaction-based application
- ☒ Batch processing system
- ☐ Systems of systems

 **Will be reviewed**

12. A library management system should allow members to borrow books, return books, and reserve titles. The system must support both desktop and mobile platforms and ensure data consistency at all times. Which of the following is a non-functional requirement? *

- ☐ System allows members to reserve titles
- ☐ System allows members to borrow books
- ☐ System allows members to return books
- ☒ System ensures data consistency

 **Will be reviewed**

13. In Scrum, which role is primarily responsible for deciding what features are included in a sprint? *

- ☐ Scrum Master
- ☒ Product Owner

☐ Development Team

☐ Project Manager

 **Will be reviewed**

14. A company is developing software for a radiation therapy machine. Which development model is best suited for this project? *

☒ V model

☐ Scrum

☐ Kanban

☐ XP

 **Will be reviewed**

15. A feasibility study is performed before requirements engineering to assess market needs and check whether a proposed software project is technically and financially realistic. *

☒ True

☐ False

 **Will be reviewed**

16. An organization adopts SAP and configures it to match its internal workflows and business rules. This is an example of reusing a *

☐ Web service

☐ Collection of objects

☒ Stand-alone application system

☐ Component framework

 **Will be reviewed**

17. Which of the following groups are intended readers of the system requirements specification? *

☐ Client managers

☒ Client engineers

☒ Contractor managers

☐ System end-users

☒ Software developers

 **Will be reviewed**

18. Which of the following is NOT an example of generic software? *

☐ Word processors

☐ Photo editing software

☐ Mobile games

☒ Banking application

 **Will be reviewed**

19. The maximum timebox for a Scrum sprint is weeks. *

☐ 1

☐ 2

☐ 3

☒ 4

 **Will be reviewed**

20. A company is developing a hospital management system. The doctors want to verify that the implemented features match their workflows. Which requirements document they should read? *

☒ User requirements

☐ System requirements

☐ Both user and system requirements

 **Will be reviewed**

21. Which of the following XP practices MOST reflect the “Embrace Change” agile principle? *

☐ Collective ownership

☐ Sustainable pace

☒ Small releases

☐ None of these

 **Will be reviewed**

22. In distributed Scrum, the Product Owner should be co-located with the development team to maintain awareness of everyday problems and establish a good relationship with the developers. *

☐ True

☒ False

 Will be reviewed

23. The system must comply with safety and privacy laws for handling personal data. This is an example of a requirement. *

- ☐ Functional
- ☒ External
- ☐ Product
- ☐ Organizational

 Will be reviewed

24. Developers regularly restructure existing code to improve readability and maintainability without changing external behavior. Which XP practice is being applied? *

- ☐ Simple design
- ☒ Refactoring
- ☐ Coding standards
- ☐ Pair programming

 Will be reviewed

25. A software team discovers that an existing ERP system meets 80% of their requirements. They decide to change some original requirements to match the capabilities of the ERP system. This will in turn lead to *

- ☐ Increased system complexity
- ☐ Reduced system reliability
- ☐ Increased development time

☒ Requirements compromise issues

 **Will be reviewed**

26. Agile methods focus on producing only the minimum required functionality while avoiding unnecessary complexity. *

☒ True

☐ False

 **Will be reviewed**

27. In XP, the development team breaks down user stories into smaller, implementation-level tasks. *

☒ True

☐ False

 **Will be reviewed**

28. In a Scrum project, unstable customer requirements necessarily cause delays in development progress. *

☒ True

☐ False

 **Will be reviewed**

29. Platform information becomes irrelevant in the design phase if the software is built from scratch without reusing any systems. *

☐ True

☒ False

 **Will be reviewed**

30. A banking system must complete transactions within 3 seconds under normal load. This requirement is an example of a requirements. *

☒ Efficiency

☐ Reliability

☐ Security

☐ Usability

 **Will be reviewed**

31. The Waterfall model is most suitable model for new technology that is not well understood. *

☐ True

☒ False

 **Will be reviewed**

32. Who is mainly responsible for performing acceptance testing of a software system developed for a specific organization? *

☐ Developers

☒ Customers

☐ Testers

☐ End users

 **Will be reviewed**

33. Software maintenance is the process of fixing bugs and improving software after deployment. *

☒ True

☐ False

 **Will be reviewed**

34. In Scrum, shielding the development team from external interference during a sprint is the responsibility of the project manager. *

☐ True

☒ False

 **Will be reviewed**

35. In which development approach does iterations occur within each individual activity, rather than across multiple activities? *

☒ Waterfall model

☐ Scrum

☐ Kanban

☐ XP

 **Will be reviewed**

36. Which stage involves searching for existing components and systems that could fulfill the required functionality? *

☐ Requirements specification

- ☐ Requirements refinement
- ☒ Software discovery and evaluation
- ☐ Component adaptation and integration
- ☐ Application system configuration

 **Will be reviewed**

37. SDLC is a set of related activities that are adopted in some form in software development, regardless of the size of the software. *

- ☒ True
- ☐ False

 **Will be reviewed**

38. In reuse-oriented software engineering, if the development team finds an off-the-shelf component that fully meets all system requirements, the MOST appropriate next step is to perform component analysis. *

- ☐ True
- ☒ False

 **Will be reviewed**

39. Which activity translates stakeholders needs into precise, detailed descriptions of system behavior? *

- ☐ Requirements elicitation
- ☒ Requirements specification
- ☐ Requirements validation

☐ Requirements evolution

 **Will be reviewed**

40. The functional requirements are primarily concerned with what the system should do and are influenced by the expected users of the system. *

☒ True

☐ False

 **Will be reviewed**

41. In sprint retrospective meeting, team members share what they did since the last meeting, identify obstacles, and plan their work for the next day. *

☐ True

☒ False

 **Will be reviewed**

42. The statement “The system shall reject appointment requests outside working hours” is an example of a non-functional requirement. *

☒ True

☐ False
